

Congratulations! Enjoy Your New Look

## Kenia Permanent Cosmetics After Care Instructions

IT IS VERY IMPORTANT THAT YOU FOLLOW THESE INSTRUCTIONS FOR PROPER HEALING. PERMANENT MAKEUP IS A DELICATE PROCESS AND SHOULD BE TREATED WITH CARE FOR OPTIMAL RESULTS AND RETENTION.

### DO

- Lightly blot blood serum build-up with a damp cotton swab for the first and second day. Scabbing and quick healing is not a goal.
- Apply a thin film of ointment given to you by your technician twice daily, morning and evening. Grape seed oil may also be used.
- Apply ice in a baggy or a bag of peas for 10 minute intervals if swelling occurs.
- If dryness persists after 10 days apply a thin veil of grapeseed oil or squalene.

### DO NOT DO

- Excessive water, No Swimming, face away from the shower head.
- Exercise, Sweat, over exposure to the sun, beach, outdoor activities will hinder the results. Sweat has salt and acts as a peeling agent therefor removing pigment.
- DO NOT pick the area if scabs do form, you will pull out pigment.
- No tanning, No Retinols or Anti-aging creams for 30 days prior or 30 days after procedure.
- DO NOT use Mascara after eyeliner procedure for 5 days. When starting up open a new tube. Mascara harbors a lot of bacteria.
- DO NOT wear contact lenses for 24 hours post procedure. Do not wear them during the eyeliner procedure, bring your glasses to drive home if needed.

### What to Expect

After your procedure you will be swollen. Some clients will swell minimally and some more. This may cause the area to look uneven and appear darker during oxidation period. The skin will shrink back to normal and pigment will lighten over the next few days. You may have 30-50% loss. Healing varies and some people scab while others do not. It is best to avoid scabbing as much as possible. If you do see areas peeling off (do not pick). It may appear very light as though no color is left underneath, just wait it will come back up to the surface of the skin in a few days.

*A touch up will be included for best results within 30-60 days.*

*Refreshers will be needed for eyebrows, between 1 yr and 18 months from original procedure date. This is to maintain a nice crisp color and shape.*

*Charges for Refreshers are as follows:*

*1 Year \$100. 2Years \$200. 3Years \$300 after 3 years it will be full price.*

## LIPS, AREOLA RESTORATION, CAMOUFLAGE

1. Follow the same protocol as directed in the aftercare.
2. Lips Include drinking through a straw for the first few days.
3. Caution when using whitening toothpastes as they will lighten the pigment color.
4. Try to avoid citrus drinks and hot spicy foods as they may irritate and lighten pigment.
